

Admission Requirements and Language of Instruction

The faculty complies with the admission regulations and requirements of the Egyptian Supreme Council of Universities (ESCU). English is the official language of instruction; all communication, lectures, coursework, and documentation are performed using the English language.

Program Facilities

- The program is run and provided by a group of highly qualified dedicated faculty members who efficiently apply novel teaching and learning methodology.
- The class rooms are well equipped for various teaching techniques with a class size of 60 students that facilitates the application of self learning and student-based learning techniques whenever applicable.
- The laboratories are properly equipped to facilitate safe efficient performance of various experiments that help understanding the theoretical bases of different courses.
- Dry labs are also available for simulation programs that serve the teaching and learning process.
- The highly specialized scientific library contains various books and periodicals in the field of pharmacy in addition to a modern digital library.

Students' Activities

- All faculty students are encouraged to join various cultural, artistic and sport activities held and supervised by the Students' Union along with the Youth Welfare Department in the faculty.
- Different assemblies and associations including ASPSA (Alexandria Scientific Pharmaceutical Student Association) are also organizing scientific forums, artistic exhibitions, medical convoys and charity work in coordination with the Youth Welfare Department.
- Field trips to pharmaceutical companies are also organized to improve students' knowledge and links with the pharmaceutical industry.

Clinical Pharmacy Program

In the heart of Alexandria, the famous Mediterranean city, lies Alexandria University, one of the most prestigious universities in Egypt. The University was established in 1938 (known then as Farouk University).

Faculty of Pharmacy

The Faculty of Pharmacy was founded in 1956 in response to the growing healthcare needs in the Arab region. Ever since, the Faculty has been providing all the Arab world and even the western communities with efficient pharmacists in the healthcare and research fields.

The Faculty of Pharmacy offers two “undergraduate degrees” “Bachelor of Pharmacy” and “Bachelor of Pharmacy (Clinical Pharmacy)”, in addition to several postgraduate degrees (Diploma, Pharm. D., Master and Ph. D.).

The faculty also plays an active role in the continuous education and professional development of pharmacists.

The Clinical Pharmacy Program

Mission

Clinical pharmacy program seeks to excellence in pharmacy education, scientific research and public health services in the practice of the pharmacy profession .

The program also seeks to prepare and produce distinct clinical pharmacists qualified to work in health services, academic field and pharmaceutical industry to meet the requirements of the labor market .

Vision

Clinical Pharmacy program aspires to provide distinct quality of education and Scientific research in the field of pharmacy for raising the efficiency of pharmacy practice, clinical services and pharmaceutical industries locally, regionally and internationally .

Career Opportunities

Clinical pharmacy can be widely defined as “the area of pharmacy concerned with the science and practice of rational use of medication.” By this definition, the opportunities for a clinical pharmacist are enormous. These include the traditional opportunities of being community pharmacist, medical rep, and pharmaceutical industry pharmacist in addition to:

- Clinical Pharmacist Specialist (in cardiology, oncology, endocrinology....etc)
- Clinical Coordinator
- Pharmacy Supervisor
- Pharmacy Director.

Postgraduate and research opportunities are also available.

These opportunities are increasingly needed on both the regional and global levels due to the growing interest in providing efficient and economic healthcare.

Program Structure

The Bachelor of Pharmacy “Clinical Pharmacy” program (credit hour system) divided on ten semesters (five academic years) of full-time study each of 15 weeks. An optional 6-8 week summer semester is also provided.

The program is designed to offer courses in a three stage building-up strategy starting with the basic sciences including biological, chemical and physical sciences in the first four semesters followed by the second stage of applied sciences such as medical and pharmaceutical sciences, drug information and therapeutics. Finally, the program provides the third and most important stage of a well-supervised real practice training in the form of: “At least” 200 hours of training in pharmacy setting along with “a minimum of ” 100 hours of clinical training in hospitals.
