

WELCOME TO The JOINT MB ChB/MBBCH PROGRAM

The faculty of medicine Alexandria university focused on promoting academic co-operation between international institutes. Consequently, they succeeded in signing a memorandum of understanding between Alexandria faculty of medicine and Manchester school of medical sciences by launching this joint scientific degree program in the academic year 2021-2022. In 2024, the Minister of Higher Education, prof. Dr. Ayman Ashour has officially inaugurated the building for the joint degree.

University of Manchester visits

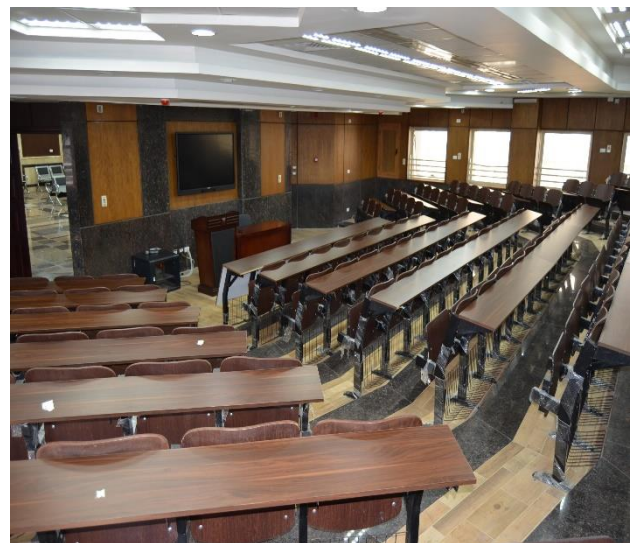

From the moment the program was launched we have been receiving endless support from our partners which was showed in their frequent visits to the Faculty of Medicine, Alexandria University along the different academic years, to inspect the educational and assessment process, hold workshops for the staff members to keep them updated and meet the students to reassure them that they are part of the bigger institution.

Advantages of the program

- Teaching is carried out using the most advanced medical education methods used in Europe based on problem-based learning that enable the students to develop the intellectual skills of critical analysis, logical thinking, clinical reasoning, and reflection.
- The program aims to prepare and graduate doctors with a high degree of efficiency who are able to work inside and outside Egypt through acquiring professional values and behaviors along with professional skills and knowledge necessary to ensure the provision of high standards of medical practice.
- After the student is accepted, he registers his data in the Faculty of Medicine, University of Manchester, and is considered one of its students, and he gives his own e-mail through which he can enter the Manchester educational website to benefit from the learning resources on the site and the university library.
- The degree certificate will be issued by Manchester University and signed by officials of both parties.
- The student has the right to attend the graduation ceremony for students of the Faculty of Medicine, University of Manchester
- Manchester Qualifying the graduate to be able to pass the medical licensing assessment in foreign countries.
